

What are Misspelled sites used for ?

Bargain shopping mostly. Day after day thousands of items are listed on eBay for sale. Every so often a mistake is made, generally a misspelling in the title. When this happens the auction item will not show up in the regular eBay search results.

That is where our software becomes very useful. We query eBay (and other sites) for the misspelled items, based on the correct spelling you type. You can then purchase these items at discounted prices do the bad spelling or carelessness of the seller.

Many of users resell the items and make a profit. It's not uncommon to find a misspelled playstation or diamond ring selling for \$1. Go ahead pick a site from the list below and give it a try, it's about the only thing left on the web that's 100% free to use.

Do I have to buy anything to use the sites ? Nope in fact here is a free gift just for downloading our ebook: [Get our Free eBay Fee Calculator and Listing tracker](#)

But wait I am not stopping there. I am giving you a life time membership to a members only eBay sellers website a \$29.00 value.
